UNITED STATES v. JULIAN PAUL ASSANGE

Clarification Statement of Christian Grothoff

1. I am Professor of Computer Science at the University of Applied Sciences in Bern. My main area of research is network security, including peer-to-peer networks and applied cryptography. I have a PhD from UCLA, was Assistant Professor at the University of Denver, and lead research groups in the area of network security at the Technical University of Munich and INRIA.

2. I was asked by the legal team of Julian Assange (Birnberg Peirce) to clarify some details about my previous statement to the court.

3. I have read Part 19 of the Criminal Procedure Rules relating to expert evidence and believe that my opinion is compliant with the rules. I understand that my duty as an expert witness is to try to help the court by providing objective analysis on matters within my expertise.

4. In points (11)-(14) I pointed out that the "xyz_z.gpg" file was publicly available via the file sharing system BitTorrent (for example in December via the well-known site **https://thepiratebay.org/description.php?id=6040906)** which due to its decentralized design makes it impossible for Wikileaks to limit its distribution. However, the file was available from multiple other sources, as anyone who downloaded it could easily republish the encrypted archive via other means. For example, https://twitter.com/p0bailey/status/13615673599070208 mentions that this archive was also downloadable via HTTP in December 2010. Thus, **it was possible to download the encrypted archive from multiple sources independent of Wikileaks long before the disclosure of the passphrase in David Leigh's book**.

5. Many sites linked already in December 2010 to the various Wikileaks mirrors. For example, http://pittsburgh.indymedia.org/news/2010/12/36684.php lists a total of 800 mirrors, including the one at http://193.198.207.6/. So **this archive was not obscure at the time when David Leigh published his book, but what the encrypted file in the archive contained was not known to the public**.

6. In point (18) of my previous statement, I said that "at the time when the Wikileaks site republished the unredacted cables, the information was already easily available to any technically competent person, for example from the cryptome.org site". To clarify, **"technically competent" in this case involves being able to open a browser and entering the URL "cryptome.org" in to the URL bar and to unpack a compressed archive** (which is a routine operation for Internet users, as compression is commonly used to reduce file size and thereby improve download speed on the Internet).

7. In adddition to the file being easily accessible via cryptome.org, http://cables.mrkva.eu/ **provided an easily searchable Web version before Wikileaks made the archive available**.

8. Making a version searchable on the Web also hardly changes how accessible the information is, as users who downloaded the archive could simply install **Desktop search software – which was already widely available at the time** (https://en.wikipedia.org/wiki/List_of_search_engines#Desktop_search_engines) **–** which enables anyone (with modest technical competency) to **create a local search index** after downloading and unpacking the archive.

9. In point (7) of my previous statement I mentioned that "cryptome.org and others report on the specific passphrase". I want to clarify that the "cryptome.org" Web site **was and is a rather well-known New York based Web site** providing a curated library. Researching site popularity data, I found https://siterankdata.com/cryptome.org which reports that the cryptome.org site was

consistently in the top 50,000 Web sites in the world in 2011-2014 (the site was turned off in 2014). For comparison, on July 10th 2011 Wikileaks.org had a ranking of 13,252 with (according to SiteRankData.com), while for the same day Cryptome.org had a ranking of 33,439. The New York Times cited cryptome.org as early as June 16th 2000 in an article. I asked a journalist to search LexisNexis, a press article index, for mentions for cryptome.org in the press. The journalist reported to me that there were 1385 mentions of the site in the press. According to genios.de, a similar service for German press articles, **the German press alone cited cryptome.org before September 1st 2011 at least 69 times**, with Süddeutsche Zeitung being the first major German newspaper referencing the site as early as December 1999.

10. The defense recently provided me with an excerpt from a FOIA response "Leopold et. al. v. NSA et. al. - Civil Action Number 1-15-cv-00999-APM" with a "Report of Investigation 2010-CID221-10117-5Y". This report demonstrates that the US government itself obtained a copy of the unredacted and decrypted cable archive from the previously mentioned Pirate Bay mirror, an encrypted copy of the archive from the 193.198.207.6 mirror and the passphrase to decrypt the encrypted copy (from the book by David Leigh) at "about 0700, 1 Sep" of 2011. **The US government was thus aware of several of the various public versions of the documents and the publication of the passphrase in David Leigh's book before the Wikileaks publication**.

11. In point (5) of my previous statement I mentioned that the "key required for decryption is fixed at the time of encryption". To make clear, in contrast, **the URL of the Web site used by Wikileaks to provide its media partners access to an encrypted copy of the full archive can be temporary** (and was indeed eventually disabled, the exact date I could not determine): it is relatively easy to remove or change the URL of a Web site. However, the passphrase itself *could not* be temporary, as after an encrypted file has been published it is not possible to change the encryption key for copies of an encrypted file that has already been distributed to other parties. Thus, after the publication of the passphrase in David Leigh's book, **Wikileaks had no chance to change the passphrase** on the encrypted file that was already copied by and in control of a multitude of unknown third parties.

12. In point (6) of my previous statement, I pointed out that "distributing the ciphertext via the Web site was a safe choice". I want to clarify what this means with respect to the intent of the distributor. **The distribution of encrypted files on the Internet without the intent of their contents ever becoming public is routine.** Some banking protocols include the transmission of encrypted archives of private transaction records. Doctors, hospitals and laboratories use encryption to exchange private medical data over the Internet. In some cases, the files are encrypted only during transmission, but in other cases they are encrypted at rest when they are stored on disk. Many popular word processing formats (Microsoft Word, OpenOffice, Acrobat PDF) include passphrase encryption as a mechanism to enable sharing of confidential business documents over insecure channels (such as Web sites or plaintext e-mail). Uploading a properly encrypted file to the Internet does not make the contents available to the public. Thus, it makes no sense to consider the upload of an encrypted file as equivalent to publishing its (encrypted) contents.

13. I would also point out that **disclosing such an encryption passphrase is never advisable, because of the possibility of the data transfer of the encrypted file being intercepted.** Anyone who intercepted David Leigh's transfer would have been able to decrypt the file, and in this case it would have been easy for them to figure out which data transfer the password decrypted. Thus, no information security professional should have deemed the disclosure of this passphrase to be safe, even without the knowledge of the existence of the many mirrors.

Many ways to wikileaks
by General Joe and friends *Monday, Dec. 06, 2010 at 4:15 AM*

> Use the web addresses below to get to wikileaks. Some may not be active, but many will be. Now go get the information. The mainstream media would have you believe that there is nothing new or eye poping there. They always tell the truth don't they? A people as free as ours can rely on the media, can't we? But maybe you had better look, anyway. Send to friends,family, and beyond. Way beyond. General Joe

Use the web addresses below to get to wikileaks. Some may not be active, but many will be.

Now go get the information. The mainstream media would have you believe that there is nothing new or eye

poping there. They always tell the truth don't they? A people as free as ours can rely on the media, can't we? But maybe you had better look, anyway.

Send to friends,family, and beyond. Way beyond. General Joe

* Powered by Bing

** Powered by Google

*** Metasearch engine

† Main website is a portal

Based on

Based on Ask.com (formerly)

- iWon

- Lycos
- Teoma

Based on Bing

- A9.com
- AOL, from 2015
- Alexa Internet
- Ciao!
- Ecosia
- Egerin
- Facebook Search, until 2014
- HotBot
- Ms. Dewey
- WebCrawler

Based on Google

- AOL Search, until 2015
- BOL
- Groovle
- MySpace Search
- Mystery Seeker
- Netscape
- Ripple
- Startpage.com

Based on Yahoo!

- Ecocho
- Forestle (an ecologically motivated site supporting sustainable rain forests – formerly based on Google)
- Rectifi

Mobile/handheld

- Taganode Local Search Engine
- Taptu: taptu mobile/social search

Geographically limited scope

Name	Language	Country
Accoona	Chinese, English	China, United States
Biglobe	Japanese	Japan
Daum	Korean	Korea
Egerin	Kurdish	Kurdistan
Fireball	German, English	Germany
Goo	Japanese	Japan
Leit.is		Iceland
Maktoob		Arab World
Miner.hu		Hungary
Najdi.si		Slovenia
Naver	Korean	Korea
Pipilika		Bangladesh
Rambler		Russia
Rediff		India
SAPO		Portugal, Angola, Cape Verde, Mozambique
Search.ch		Switzerland
Sesam		Norway, Sweden
Seznam		Czech Republic
Walla!		Israel
ZipLocal		Canada, United States

Accountancy

- IFACnet

Business

- Business.com
- GenieKnows (United States and Canada)
- GlobalSpec
- Nexis (Lexis Nexis)
- Thomasnet (United States)

Computers

- Shodan (website)

Dark Web

- Ahmia
- Grams
- TorSearch

Education

General:

- Chegg
- SkilledUp

Academic materials only:

- BASE (search engine)
- ChemRefer
- CiteULike
- Google Scholar
- Library of Congress

Enterprise

- Apache Solr
- Funnelback: Funnelback Search
- Jumper 2.0: Universal search powered by Enterprise bookmarking
- Oracle Corporation: Secure Enterprise Search 10g
- Q-Sensei: Q-Sensei Enterprise
- SimilarWeb[28]
- Swiftype: Swiftype Search
- TeraText: TeraText Suite

Events

- Tickex (US, UK)
- TickX (UK, Ireland, Spain, Netherlands)

Food/recipes

- RecipeBridge: vertical search engine for recipes
- Yummly: semantic recipe search

Genealogy

- Mocavo.com: family history search engine

Job

- Adzuna (UK)
- CareerBuilder (USA)
- Craigslist (by city)
- Dice.com (USA)
- Glassdoor (USA)
- Indeed (USA)

- JobStreet.com (Southeast Asia, Japan and India)
- Monster.com (USA), (India)
- Naukri.com (India)
- Rozee.pk (Pakistan)
- Yahoo! HotJobs (Countrywise subdomains, International)

Legal

- Google Scholar
- Lexis (Lexis Nexis)
- Quicklaw
- WestLaw

Medical

- Bing Health
- Bioinformatic Harvester
- CiteAb (antibody search engine for medical researchers)
- EB-eye EMBL-EBI's Search engine
- Entrez (includes Pubmed)
- GenieKnows
- Healia
- Healthline
- Nextbio (Life Science Search Engine)
- PubGene
- Quertle (Semantic search of the biomedical literature)
- Searchmedica
- WebMD

News

- Bing News
- Google News
- Newslookup
- Nexis (Lexis Nexis)
- Yahoo! News

People

- FindFace
- PeekYou
- Spokeo
- Zabasearch.com
- ZoomInfo

Real estate/property

- HotPads.com
- Realtor.com
- Redfin
- Rightmove
- StuRents.com
- Trulia
- Zillow
- Zoopla

Television

- TV Genius

Video games

- Wazap

By data type

Search engines dedicated to a specific kind of information

Maps

- Bing Maps
- Géoportail
- Google Maps
- MapQuest
- Nokia Maps
- OpenStreetMap
- Tencent Maps
- Wikiloc
- WikiMapia
- Yahoo! Maps
- Yandex Maps

Multimedia

- Bing Videos
- blinkx
- FindSounds
- Google Video
- Munax's PlayAudioVideo
- Picsearch
- Pixsta
- Podscope
- SeeqPod
- Songza

- Tencent Video
- TinEye
- TV Genius
- Veveo
- Yahoo! Video

Price

- Bing Shopping
- Google Shopping (formerly Google Product Search and Froogle[29])
- Kelkoo
- MySimon
- PriceGrabber
- PriceRunner
- PriceSCAN
- Pronto.com
- Shopping.com
- Shopzilla
- SwoopThat.com
- TheFind.com
- TickX

Source code

- Google Code Search
- Koders
- Krugle

BitTorrent

These search engines work across the BitTorrent protocol.

- BTDigg
- Isohunt
- Mininova
- The Pirate Bay
- TorrentSpy
- Torrentz

Blog

- Amatomu
- Bloglines
- IceRocket
- Munax
- Regator
- Technorati

Email

- TEK

Forum

- Omgili

Question and answer

Human answers

- Answers.com
- eHow
- Quora
- Stack Overflow/Stack Exchange Network
- Uclue
- wikiHow
- Yahoo! Answers

Automatic answers

- AskMeNow
- BrainBoost
- True Knowledge
- Wolfram Alpha

By model

Search appliances

- Fabasoft
- Google Search Appliance - discontinued
- Munax
- Searchdaimon
- Thunderstone

Desktop search engines

Desktop search engines listed on a light purple background are no longer in active development.

Name	Platform	Remarks	License
Autonomy	Windows	IDOL Enterprise Desktop Search, HP Autonomy Universal Search.[30]	Proprietary, commercial
Beagle	Linux	Open source desktop search tool for Linux based on Lucene. Unmaintained since 2009.	A mix of the X11/MIT License and the Apache License
Copernic Desktop Search	Windows	Major desktop search program. The full trial version downgrades after the trial period automatically to the free version, which is (anno 2018) limited to indexing a maximum of 10.000 files.	Proprietary (30 day trial)
DocFetcher	Cross-platform	Open source desktop search tool for Windows and Linux, based on Apache Lucene	Eclipse Public License
dtSearch Desktop	Windows		Proprietary (30 day trial)
Everything	Windows	Find files and folders by name instantly on NTFS volumes	Freeware
GNOME Storage	Linux	Open Source desktop search tool for Unix/Linux	GPL
Google Desktop	Linux, Mac OS X, Windows	Integrates with the main Google search engine page. 5.9 Release supports x64 systems. As of September 14, 2011, Google has discontinued this product.	Freeware
ISYS Search Software	Windows	ISYS:desktop search software.	Proprietary (14-day trial)
Locate32	Windows	Graphical port of Unix's locate & updatedb	BSD License[31]
Lookeen	Windows	Desktop search product with Outlook plugin and limited support for other formats via IFilters, uses Lucene search engine.	Proprietary (14-day trial)[32]
Nepomuk	Linux	Open Source semantic desktop search tool for Linux. Has been replaced by *Baloo* in KDE Applications from release 4.13 onward.	License SA 3.0 and the GNU Free Documentation License 1.2
Recoll	Linux, Unix, Windows, macOS	Open Source desktop search tool for Unix/Linux	GPL [33]
Spotlight	macOS	Found in Apple Mac OS X "Tiger" and later OS X releases.	Proprietary
Strigi	Linux, Unix, Solaris, Mac OS X and Windows	Cross-platform open source desktop search engine	LGPL v2 [34]
Terrier Search Engine	Linux, Mac OS X, Unix	Desktop search for Windows, Mac OS X (Tiger), Unix/Linux.	MPL v1.1[35]
Tracker	Linux, Unix	Open source desktop search tool for Unix/Linux	GPL v2 [36]
Tropes Zoom	Windows	Semantic Search Engine (no longer available)[37]	Freeware and commercial
Unity Dash	Linux	Part of Ubuntu Desktop	GPL v3[38], LGPL v2.1[39]
Windows Search	Windows	Part of Windows Vista and later OSs. Available as Windows Desktop Search for Windows XP and Server 2003. Does not support indexing UNC paths on x64 systems.	Proprietary

Name	Platform	Remarks	License
X1 Desktop Search	Windows	Major desktop search product along with Copernic Desktop Search.	Proprietary (14-day trial)[40]

Kids' safe search engines

- Kiddle
- KidRex
- KidzSearch

Metasearch engines

Name	Language
Dogpile	English
Excite	English
Info.com	English
Kayak.com	Multilingual
Mamma.com	
Metacrawler	English
Mobissimo	Multilingual
Otalo.com	English
Publisher's clearinghouse Search and Win	
Searx	Multilingual
Skyscanner	Multilingual
Yippy (formerly Clusty)	English

Natural language

- Ask.com
- Bing (Semantic ability is powered by Powerset)
- Lexxe

Open source search engines

- ht://Dig
- Isearch
- Lemur Toolkit & Indri Search Engine
- Lucene
- mnoGoSearch
- Nutch
- Recoll
- Searchdaimon
- Searx
- Seeks

- Sphinx
- SWISH-E
- Terrier Search Engine
- Xapian
- YaCy
- Zettair

Web search engine

- Gigablast
- Grub

Enterprise search

- Apache Solr
- Elasticsearch[41]

P2P search engines

Name	Language
FAROO	English
Seeks (open source)	English
YaCy (free and fully decentralized)	Multilingual

Privacy search engines

- DuckDuckGo
- HotBot
- MetaGer
- Mojeek
- Qwant
- Searx
- Startpage.com
- Swisscows

Social and environmental focus

- Ecosia

Semantic browsing engines

Name	Description	Speciality
Evi	Specialises in knowledge base and semantic search	answer engine
Swoogle	Searching over 10,000 ontologies	Semantic web documents
Yebol	defunct	
Yummly	Semantic web search for food, cooking and recipes	food related

Social search engines

- ChaCha Search
- Delver
- Eurekster
- Facebook Search
- Mahalo.com
- Rollyo
- SearchTeam
- Sproose
- Trexy

Usenet

- Google Groups (formerly Deja News)

Visual search engines

- FindFace
- Grokker
- Macroglossa
- Pixsta
- TinEye
- Viewzi

By popularity

Defunct or acquired search engines

- AlltheWeb (acquired by Yahoo!)
- AltaVista (acquired by Yahoo! in 2003, shut down in 2013)
- Bixee.com (India) (acquired by Ibibo)
- Blekko (acquired by IBM in 2015 for its use for Watson-based products)[42]
- BlogScope (acquired by Marketwire)
- Brainboost (public engine no longer exists, acquired by Answers, Inc.)
- BRS/Search (now OpenText Livelink ECM Discovery Server)
- Btjunkie
- Cuil (public engine no longer exists, acquired by Google Inc)
- DeepPeep
- Direct Hit Technologies (acquired by Ask Jeeves in January, 2000)

- Getit Infoservices Private Limited
- Google Answers
- GoPubMed (knowledge-based: GO – GeneOntology and MeSH – Medical Subject Headings) (engine no longer exists)
- hakia (no longer exists)
- IBM STAIRS
- Infoseek (acquired by The Walt Disney Company)
- Inktomi
- Kartoo
- LeapFish (public engine no longer exists)
- Lotus Magellan
- MetaLib (public engine no longer exists)
- mozDex (no longer exists)
- Munax (no longer exists)
- Myriad Search (no longer exists)
- Overture.com (formerly GoTo.com, now Yahoo! Search Marketing)
- PubSub
- RetrievalWare (acquired by Fast Search & Transfer and now owned by Microsoft)
- Scroogle (Google Scraper)
- Singingfish (acquired by AOL)
- Speechbot
- Sphere (acquired by AOL)
- Tafiti (replaced by Microsoft Bing)
- Volunia[43]
- Wikia Search (defunct)
- WiseNut
- World Wide Web Worm
